

RGB Mileage User Guide

Version 2.0.8 - 2026-06-04

Overview

RGB Mileage is a vehicle-first Progressive Web App for mileage, fuel, maintenance, insurance, and vehicle history tracking.

Data Management

- Create JSON Backup exports the full application data.
- Restore JSON Backup restores a full app backup.
- Legacy backups are detected and converted when possible.
- Export Fuel CSV exports fuel records only.
- Import Fuel CSV imports fuel records only.
- Download CSV Template creates a fuel import template.

Backup Compatibility

- Current versions must restore prior RGB Mileage backups whenever technically possible.
- Older backups are converted to the current format during restore.
- Only corrupted or unreadable files should be rejected.
