

RGB Mileage User Guide

Version 2.0.7 - 2026-06-04

Overview

RGB Mileage is a vehicle-first Progressive Web App for mileage, fuel, maintenance, insurance, and vehicle history tracking.

Home Screen

- Two large vehicle circles remain the primary navigation.
- Tap a vehicle circle to open Quick Fuel Entry.
- Long press a vehicle circle to edit that vehicle.
- If no photo exists, initials such as JGW, CC10, F150L, or CJ7 are displayed.

Vehicle Photos

- Primary vehicle photos appear inside Home Screen circles.
- Use the circular preview to zoom out or in.
- Drag the image inside the circular preview to choose the focus area.
- The chosen zoom and position are saved with the vehicle.

Fuel Entries

- Odometer, gallons, fuel grade, ethanol-free status, station, price, total cost, receipt attachments, and notes are supported.
- Fuel Price Per Gallon and Total Fuel Cost use two decimal places.
- Recent entries appear below the Quick Fuel Entry form.

Backup and Restore

- Download a JSON backup before deployment.
- Restore a selected JSON backup from the Backup screen.
- The app validates and normalizes backup structure before restoring.

Import and Export

- CSV export remains available.
- CSV/JSON import workflow remains available.
- XLSX import is deferred to a future release to protect startup reliability.

Deployment

- Upload all files to the GitHub repository root.
- Do not use icon folders.
- Use the Deployment log and Fix Notes verification checklist after every release.
