

RGB Mileage User Guide

Version 1.1.0 - 2026-06-03

Overview

RGB Mileage is a vehicle-first PWA. The Home Screen is built around large vehicle circles. Tap a circle to enter that vehicle's records.

Home Screen

- Two large vertically stacked vehicle circles.
- Vehicle photo appears inside the circle when available.
- If no photo exists, initials such as JGW, CC10, F150L, or CJ7 are displayed.
- An empty vehicle circle shows a plus sign.
- Long press an occupied circle to open the editable Vehicle Information screen directly.
- The iPhone image save/copy menu is suppressed on Home Screen vehicle circles.

Vehicle Photo Crop Tool

- Choose a vehicle photo.
- Use Crop / Frame Photo to adjust the Home Screen circle.
- Drag the photo under a fixed circular preview.
- Use the zoom slider to zoom out or in.
- Save Crop stores zoom and x/y offsets per vehicle.
- Reset Photo Crop returns the image to centered/default framing.

Vehicle Order

- Open Settings.
- Select Manage Vehicle Order.
- Use Swap Vehicle Positions.
- The entire vehicle record moves, including photo, crop, vehicle information, fuel records, maintenance records, insurance data, and statistics.

Fuel Entries

- Entry Type: Fuel, Maintenance, Historical Marker.
- Data Quality: Verified, Review, Estimated, Historical.
- Odometer and Miles fields are supported.
- Miles are recalculated from odometer entries when possible.
- Fuel Grade allows blank, 87, 89, 90, 91, 93, and Other.
- Ethanol Free is stored as Yes/No and displayed as Ethanol or Ethanol Free.
- Optional fuel price fields use two decimals only.

Location

- Location is manually triggered with Use Current Location.
- The app never captures location automatically on screen load.
- If a station is detected, the app asks Use This Station?
- The user may choose Yes, Location Only, or Cancel.
- If Yes, the app asks whether to Add To Station Drop Down List.

Import

- CSV and XLSX import are supported.
- Automatic column mapping is attempted.
- A preview is shown before saving.
- Errors and possible duplicates are displayed before import.
- Record ID prevents duplicates and supports re-import/update.
- Entry Sequence preserves historical order when dates are missing.

Data Quality Reporting

By default, Review and Historical records are excluded from fuel statistics unless the user chooses to include them.

Maintenance

- Drop Off Date
- Pick Up Date
- Location
- Category
- Odometer
- Cost
- Notes

Insurance

- Company
- Policy Number
- Effective Date
- Expiration Date
- Insurance Value
- Attachments

Versioning and Package Standards

- Release package uses RGBM_v1.1.0_2026-06-03.zip.
- Both README.md and versioned README are included with identical content.

- The version appears at the bottom of every page.
- All icon files are root-level with no required icon folder.
